Safety Moment

• Did you know that the Guide to Safe Scouting bans the use of Accelerants for starting fires. So how do you start a charcoal fire?

• Lighting a charcoal fire without using a liquid or gel accelerator is possible. When you light charcoal in a chimney, it takes less time to prepare your briquettes and is a better way to control your fire output.
Safety Moment

Tips for lighting your charcoal:

• Instant lighting charcoal (with or without a chimney)
• Starter cubes (with or without a chimney)
• Homemade fire starters (placed under chimney)
  • Cardboard egg cartons/toilet paper tubes/newspaper
  • Processed corn chips
